

## ORGANIZED PRODUCT LIBRARY

ProdLib is developed to support the design process of architects and structural engineers. We bring leading manufacturers' product catalogues directly to your desktop and keep them updated for you. Product libraries contain thousands of BIM models for the most popular design software such as ArchiCAD, AutoCAD or Revit. And best of all, it's all free.

Browse libraries, adjust product parameters and insert perfect solutions into your projects or read documentation and support materials. Everything you need to create complete designs is at your fingertips.

## MAKING A DIFFERENCE

Using ProdLib to support your design process can greatly improve the efficiency of your workflow. No more searching through websites for updates or documents because everything you need is just a few clicks away in ProdLib.

## WE ARE ALSO ON THE WEB

Our Web Library is a free web-based tool for browsing ProdLib content and getting an overview of the service itself. The Web Library contains not only a large amount of CAD and BIM models but also product information and you can search content with a convenient search engine and filters. More models and features are available in the ProdLib application.
